

REMARKS

The specification and claims have been amended in order to more particularly point out and distinctly claim the subject matter to which the applicants regard as their invention.

The above amendment is also submitted to place the specification and claims in substantially the same condition as the specification and claims as amended under Article 34 in the international application. An English translation of the annexes of the PCT international preliminary examination report is enclosed. Early and favorable action is awaited.

In the event that any fees are due in connection with this paper, please charge our Deposit Account No. 01-2340.

Respectfully submitted,
